

## Russian GAP Resurs trusts HatchTech with a 5th major hatchery project

After constructing four large turn-key HatchTech hatcheries, Russian based GAP Resurs has once again chosen HatchTech as supplier of a new major hatchery facility in the Southern part of Russia. In addition, HatchTech will deliver, among others, the complete ventilation system, the heat recovery system, the water management system and the HatchTech's proven Energy Recovery System™.

With a total production capacity of 105 million eggs/year, the new hatchery is bringing the total group capacity of HatchTech incubation at GAP Resurs to an impressive 380 million eggs/year. The new hatchery will consist out of 32 HatchTech MicroClimer Setters 168960, 24 MicroClimer Hatchers 42240 and two Chick Storage Rooms.

Mr. Viktor Nauruzov, Chairman of the Board at GAP Resurs comments: "For our company, it is highly important to hatch the highest possible quality day old chicks. Based on our experience with HatchTech we are very well able to asses this. We are very satisfied and therefor HatchTech remains our partner in incubation."

## Agro & Construction Solutions: Successful distributor for Central America

Agro & Construction Solutions, a company with a strong presence in Central America, has obtained the representation of HatchTech for the countries Guatemala, Belize, El Salvador Honduras, Nicaragua, Costa Rica y Panama. Agro & Construction Solutions will represent the whole HatchTech portfolio; HatchTech, HatchBrood and HatchTraveller.

Agro & Construction Solutions has a team with experienced and well-known persons in the poultry industry. HatchTech extends their range of high quality products within the poultry industry.

Roberto Echeverria, HatchTech Representative of Agro & Construction Solutions: "After having participated in HatchTechs Agency Days in 2014, I was convinced to have a success with HatchTech in Central America. HatchTech is a company with innovative and revolutionary products. HatchTech is focusing on improving the well-being of the chicken. It is a worldwide trend that people are looking for quality products to improve efficiency and animal welfare. The product portfolio of HatchTech aligns perfectly with our current product portfolio. We are confident that our network and HatchTech's products will contribute to a mutual success in the Central American market."

## VIV Asia 2015

VIV Asia that took place from 11 until 13 March has gone well for HatchTech. With a total of 38.000 visitors at the fair our stand attracted a lot of attention.

Asia is getting ready for HatchCare - our hatcher with light, feed and water - generated overwhelmingly positive reactions among our visitors! Not to forget about the Chick Storage Room, that has proven to be a great success. HatchBrood - our brooding solution designed to uniformly provide the optimal environment for all chicks during the first days of life - managed to trigger the crowd even more! We would like to thank everyone who visited us at VIV Asia 2015.

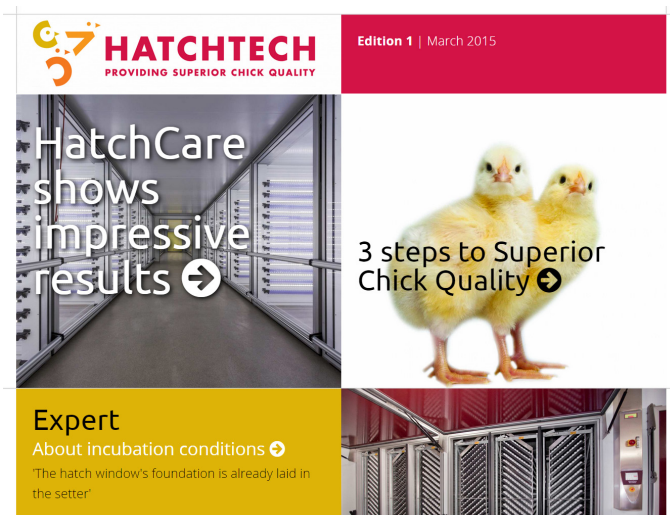

## HatchCare Revolution Arrives in North America

At the IPPE Poultry Convention 2015, in Atlanta, USA, HatchTech and the Canadian based Synergy Agri Group Inc. signed an agreement for the delivery of a complete new hatchery facility. The facility will be equipped with HatchCare – the hatcher with feed and water.

Mr. Ron Testroete, Director at Synergy Agri Group Inc.:  
“Our Company exists of real poultry enthusiasts and poultry fanatics. In everything we do, we aim for one thing: superior chick quality. This is achieved with HatchTech incubators. Now, with HatchCare, we know that the hatched chicks will be immediately supplied with the basic necessities of life – feed and water. We are extremely happy that we will be the first company in North America to install HatchCare in a state of the art hatchery.”

## Have you seen our Digital Magazine?

The first edition of our fully interactive digital magazine is now live! Learn about:

- HatchCare’s first impressive field results
- The importance of uniform incubation conditions
- The key to successful incubation
- This and many more exclusive items are covered in our new company magazine!

The Magazine’s second edition will follow in June and will include groundbreaking items about chick storage; antibiotic-free production; warming profiles and uniform embryo temperatures.
